PERSONAL PROJECT

MyMart (User) and MyMart (Admin), Mar 2023 - Jul 2023

Found through personal website, but due to unexpected deployment issues, it became slow, please be patient with it

MyMart is a fullstack point-of-sale e-commerce website builder developed using React, JavaScript, NextJS, and MongoDB. It includes features like category and product management, customizable design (light and dark modes), product performance analytics, user management, and customer location tracking using the Google Maps API. Which was made to consolidate and apply my skills, this project demonstrates proficiency in frontend and backend development.
